EDUCATION

De La Salle University

Bachelor of Science in Computer Science, Major in Software Technology (3rd year)

Manila, Malate

Aug. 2023 – May 2027

EXPERIENCE

IT Assistant Staff

NGDumlao Inc

June 2023 – August 2023

Wak-Wak, Mandaluyong

- Maintained and monitored on-premise servers to ensure uptime and data integrity
- Diagnosed and resolved network and server performance issues, improving office connectivity and speed.
- Handled LAN setup and troubleshooting of routers, switches, and office network devices

Software Developer Intern

Vertex Pro Inc

May 2025 – August 2025

Ayala, Makati

- Developed an employee verification and tracking system that used time- and location-stamped photos (via metadata) to ensure on-site attendance compliance.
- Built an NBI clearance verification tool using AWS Textract to automatically extract and validate data from government-issued documents, reducing manual review time.
- Implemented an automated letter-generation system based on pre-defined templates, improving administrative efficiency and reducing repetitive work.

Full-Stack Developer Intern

Symph

September 2025–December 2025

Cebu, Cebu City

- Migrated an existing application from Full-stack NextJs to a monorepo architecture with the use of Nest, Next, Nx and Google Cloud Storage, improving the code organization and deployment efficiency.
- Developed Features such as optimizing AI Image generations, automatic image upload/generation workflow for seamless user interactivity.
- Debugged and built new features for a payment gateway application integrated with services like Dragonpay, ensuring smooth transaction and easy development structure for other developers. That's used by a lot of small businesses.

PROJECTS

MERN Web Forum | NextJS, Multer, MERN Stack, AWS S3, WebSockets, React

February 2025 – Present

- Built a full-stack forum platform with secure user authentication and real-time messaging using WebSockets.
- Integrated image uploads via Multer + S3 Cloud Storage to store images online instead of URLs
- Implemented online presence tracking, allowing users to see active members and initiate conversations.

Bus Tracking System w/Ticketing | NextJS, MySQL, React Native, Prisma, Typescript

April 2025 – May 2025

- Built a mobile + web-based system to digitize bus ticketing and tracking, replacing manual processes for a bus company in Visayas.
- Implemented live bus tracking via React Native for drivers, increasing operational transparency.
- Developed and delivered features in a Scrum-based Agile team, enhancing collaboration and on-time project completion.

Konektinda (Founder Startup) | NestJs, PostgreSQL, Docker, React Native, Cloudflare R2

2025 – Present

August

- Architected and developed the backend infrastructure using NestJs, PostgreSQL, Drizzle, Docker, Firebase Authentication, Cloudflare R2 to ensure scalability and maintainability.
- Implemented Test-Driven Development (TDD) to improve code reliability, consistency, and streamline the development process.
- Collaborated on the React Native frontend, integrating backend APIs and contributing feature implementations.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, Javascript, Typescript, React Native, React

Frameworks: Node.js, Next.js, NestJs, Laravel, Vite, Nx

Tools and Cloud: Git, Docker, Jest, Cypress, GCP, AWS, Firebase, Cloudflare

Databases: PostgreSQL, MySQL, MongoDB

Libraries: Express, Multer, Prisma, Drizzle, Websockets

Certification

Google Cloud Digital Leader (Credentials available on request)
